

## A three-part program to bring your building to the Future of Clean

*Consult2Clean is a three-step program that starts with our team performing an in-depth evaluation of your facility and cleaning program. Next we'll train your team on how to best clean and disinfect your space to ensure it is safe for your employees and guests. Then, we'll provide you with the quality assurance plan, tools, and support to make sure your team and your building are running at top cleaning capability. Together, we'll make sure your facility is brought to the future of clean.*

### **Part 1. Evaluate your site.**

*Let our team do a complete walk-through and evaluation of your site, complete with a step-by-step review with your management team and the pertinent program documents you need to keep your team on task in the future.*

### **Part 2. Train your cleaning team.**

*Our CMI-certified training instructor will walk your team through the ins and outs of the cleaning world until they are confident in their skills.*

### **Part 3. Step into the future of clean.**

*Once your team has completed their training and your new protocols are in place, your site will be at a new standard of clean. Our program includes a long-term quality assurance plan that helps ensure your team is making the most of the tools you've invested in for your site.*

Don't let the future get started without you, contact Jay Kucharek today for your customized program

## Don't let COVID-19 get the best of your facility

*Consult2Clean is a three-step program that gives your cleaning team the support and tools they need in today's world to ensure your facility is safe from COVID-19 and anything else that may come your way. By evaluating your specific site, training your team, and working with you on a long-term quality assurance program that fits your needs, Consult2Clean brings the future of cleaning to your site today!*

### **Concern:** What precautions should our site be taking in regards to COVID-19?

*While there are general solutions in the marketplace for keeping buildings clean and safe from COVID-19, we know that you care about YOUR team, YOUR visitors, YOUR building. We will walk your site and get to know your team so we can evaluate which solutions make sense for YOU.*

### **Concern:** Does my team know how to do the things you're recommending?

*Our CMI-certified instructor will craft a training schedule tailored to your team's needs. He will walk your team through the ins and outs of the cleaning world until they are confident in their skills. Our special pandemic response training program will ensure that each member of your team has the knowledge and tools to handle cleaning and disinfection in a pandemic situation.*

### **Concern:** Will we be on our own once the evaluation and training have been completed?

*Consult2Clean is all about quality assurance. Our specialists will be there for you and your team long after the initial evaluation and training. We'll be here to offer quarterly reviews of your location, train new employees as needed, and perform audits when you need. Our team is honored to be a part of your team.*
